The Lancaster Course in Ophthalmology

For Residents, Practicing Ophthalmologists and Optometrists

July 7 - August 1, 2025

Course Director: Lucy H. Young, M.D., Ph.D.

The Lancaster Course in Ophthalmology will be held as a virtual online course in 2025. The four week course will provide contemporary and comprehensive coverage of the clinical sciences in Ophthalmology. Founded in 1946, the Lancaster Course has offered training to young ophthalmologists from all over the world and has supplemented training for many teaching hospitals in the States and in Canada. The faculty is selected for its expertise, clarity of presentation and ability to contribute high quality visual aids. Residents and practicing ophthalmologists and optometrists are all welcome to attend. In addition to live lectures delivered via Zoom, the faculty will share a wealth of recordings for students to access in the online gallery at their convenience. After the lectures are delivered and recorded, they will also be loaded in the gallery. All course material will remain accessible to the registered students through September 26th, 2025.
